FOR IMMEDIATE RELEASE

MXL® Releases Affordable Instrument Recording Package

Available as a pair, the MXL 603 Instrument Microphone recording pack delivers natural acoustic properties for overhead drums, piano, string instruments, and more.

El Segundo, CA, January 15, 2009 – MXL® Microphones the professional audio division of Marshall Electronics, has released the 603 Instrument Microphone as a value-added recording pack for today's professional and working musicians.

According to MXL, the 603 shares characteristics of European and Japanese imports at a fraction of the price and delivers natural acoustic properties for overhead drums, piano, string instruments, brass, etc. "The 603 Instrument Pair is a real bang for the buck" says Jim Mona, MXL's National Sales Manager. "This mic is very detailed and bright, but not too bright, and performs amazingly well on just about any kind of instrument."

According to Mr. Mona, the 603 can handle guitar amp recordings and uses a transformerless design that provides a solid bottom and an extremely open top end sound, capturing most instruments' harmonics as well as natural tones.

The MXL 603 Instrument Pair includes a deluxe carrying case.
