FOR IMMEDIATE RELEASE

MXL® Issues Limited-edition Gold 35 Microphone

The highly-anticipated gold-plated condenser microphone offers style, warmth and transparency to every recording.

El Segundo, CA, January 15, 2009 – MXL® Microphones the professional audio division of Marshall Electronics, announces the arrival of the MXL Gold 35, a unique gold-plated, large-diaphragm condenser microphone that offers high performance and high style to studio recordings.

“The Gold 35 is more than a microphone,” says Jim Mona, MXL’s National Sales Manager. “It’s the kind of mic that when you take it out of the box, people first become mesmerized by its appearance and then by the sound.”

According to Mr. Mona, in addition to the stunning gold-plated metal finish, the Gold 35 features advanced design and engineering like a large 35mm gold diaphragm and low-noise circuitry to reveal the most subtle sonic details and provide the ultimate warmth and openness. A gold-sputtered diaphragm with fixed cardioid pickup pattern and high SPL capability help the Gold 35 excel in critical studio and broadcast applications.

“Whether you’re into rock, rap, R&B, hip-hop or want to record your favorite instrument, the Gold 35 is going to have a coveted spot in your microphone collection,” concludes Mr. Mona. “It’s a perfect fit for artists and musicians who want to stand out from the crowd.”

The MXL Gold 35 includes a shockmount, leather box, and windscreen.
