FOR IMMEDIATE RELEASE

MXL® INTRODUCES V89 STUDIO CONDENSER MICROPHONE

The highly anticipated V89 Studio Condenser Microphone offers rich, natural and extremely accurate recordings at a price that all musicians can afford.

El Segundo, CA, March 31, 2009 – MXL Microphones, the professional audio division of Marshall Electronics, announces the arrival of the V89, a studio condenser microphone that puts extraordinary features in the hands of working musicians. One of the most anticipated microphones to come from MXL since the ground-breaking Genesis mic, the V89 can tackle any recording task and offers outstanding performance on vocals, acoustic guitar, strings piano and more.

“The V89 is an incredible sounding microphone from our Studio Collection series,” says Jim Mona National Sales Manager, MXL Pro Audio Division. “This microphone offers stunning detail and [as I can only describe] is capable of delivering an extremely full and airy recording. The sustain and gain delivered from the V89 is everything I need from a microphone to make a high quality recording.”

According to Mr. Mona, features that truly distinguish the V89 from condenser microphones in (and even above) its price range include a custom body design that minimizes body resonance as well as a tuned grill cavity that helps eliminate standing waves and reduce harmonic distortion. Utilizing a cardio polar pattern, the V89 also boasts a gold-sputtered diaphragm, high sensitivity and very low noise circuitry. All this, according to the company, adds up to a serious condenser microphone that picks up the natural tone of guitars, the subtle details of a fine piano, and the raw attack of screaming vocals.

The MXL V89 Studio Condenser Microphone includes a sturdy wood case, shockmount and has a street price of \$399. The MXL V89 also includes a 3-year warranty.
